Overview

I am fifth year electrical and electronics engineering student with great software development passion. I have four months of coding experience with ever growing programming interest. I possess a strong coding foundation having worked with various teams and one complete web application at andela cycle 37 bootcamp.

Education

Bachelor's degree in electrical and electronics engineering (Machakos University)

I am currently an electrical and electronics engineering student at machakos university with hopes of completing my studies on april. I have taught myself how to code in addition to the few it courses offered at the university.

Kenya certificate of secondary education(KCSE)

In 2013, I completed my secondary education at Chebara boys high school earning a KCSE certificate after scoring a mean grade of A-.

Experience

Andela fellowship cohort 37

- Flask and Flask-Restful
- Postgresql database
- Git, Heroku and Travis-Ci
- Psycopg2
- App documentation
- Test driven development
- Fetch-API
- HTML5 and CSS

Skills

- I am very good at implementing feedback.
- I am good at communication.
- I am good at implementing the git workflow.
- I am good at creating APIs with Flask and Flask-Restful.

- I am good at using pivotal tracker to manage my projects.
- Generally, my technical and interpersonal skills are good.
- I am good at igniting inner passion in anything.
- My learning speed is good.

Technologies

Programming:

- Python, CSS, HTML5, Javascript, SQL.

Relational Databases:

- MySQL, PostgreSQL.

Development Tools:

- Sublime Text, atom, vscode

Version Control:

- Git

Continuous Integration:

- Travis-Ci

App deployment:

- Heroku

Content Management Systems:

- Medium, Youtube

Interests

Apart from coding, I like playing karate so much, I don't play for a club but I do pay an instructor to train me every thursdays and saturday. I train almost everyday from five o'clock to six. I also fancy music, especially country music, bongo and rock music.
